

ELLIE WANG

☎ (714) 932-0311 ✉ elliewang31@gmail.com  [linkedin.com/in/elliekwang](https://www.linkedin.com/in/elliekwang)

Education

University of California, San Diego

Bachelors of Science in Data Science; GPA: 3.85

Experience

EquipmentShare

June 2025 – August 2025

Data Science Intern

Remote

- Queried 80K+ work orders and asset-hour records using Snowflake SQL to build structured datasets from Looker-based operational dashboards for fleet optimization.
- Engineered make-model-year part failure and consumption aggregates to support demand forecasting.
- Developed an interpretable 45-day part demand forecasting system to reduce stockout risk.
- Deployed containerized data pipelines via Airflow, materializing production tables for analytics and inventory planning.

Prism Data

January 2026 – March 2026

Credit Risk Modeling Analyst – UCSD Industry Capstone

San Diego, CA

- Built a credit risk pipeline on >1M financial records, leveraging transaction-level data to enable cash flow underwriting for borrower delinquency prediction.
- Used NLP on transaction descriptions to categorize spending and identify regular income sources.
- Engineered >100 financial behavior features (income stability, volatility, debt ratios) for gradient-boosted models.
- Trained and validated XGBoost and LightGBM models, achieving ~0.80 ROC-AUC and producing interpretable risk scores.

Deloitte

April 2024 – June 2024

Data Science Mentee

Remote

- Trained a Random Forest regression model to predict customer purchase behavior, optimizing hyperparameters to improve forecast accuracy.
- Presented insights to recommend targeted marketing and inventory optimization strategies to improve their bottom line.

Projects

Recipe Rating Prediction Using User Reviews | Scikit-learn, TextBlob

December 2024

- Engineered TF-IDF and sentiment polarity features to model review content and user sentiment.
- Built baseline models (item averages, SVD) and an NLP model to improve rating predictions.
- Evaluated performance using MAE, prediction error distance, and PTP, achieving a 20% gain over baseline.

Geospatial Analysis of Airbnb Trends | HTML, D3.js, Python, Pandas

June 2024

- Created an interactive bar chart and heatmap using D3.js to visualize insights for Airbnb hosts and guests.
- Extracted Airbnb locations using coordinates from GeoJSON files to design an interactive map using Leaflet.
- Added tooltips with additional information to ensure user-friendly engagement and understanding.

Technical Skills

Languages: Python, SQL, JavaScript, TypeScript, Java, HTML, CSS

Machine Learning & Data: NumPy, Pandas, Dask, Scikit-learn, TensorFlow, XGBoost, LightGBM

Data Engineering: Snowflake, Airflow, Docker

Visualization: Matplotlib, D3.js, Tableau, Looker

Platforms & Tools: AWS, PostgreSQL, MySQL, Git, Bash
